Problem Solving Using AI Tools — online workshop

SKILLS

Programming Skills: Python,Java,C,MySQL

Soft Skills: Teamwork,Decision making,Communication

Web-Technologies: HTML,CSS

Hackerank Score: 7557

PROJECTS

SPEECH TO TEXT CONVERTOR, *IN PYTHON*
Typing everything by hand takes a lot of time and effort. Some people also find it hard to type, especially those with disabilities. Current speech-to-text tools are not always accurate and may not work well in noisy places or with different accents. So, we need a better system that can quickly and correctly turn speech into text.

BLOOD DONATION MANAGEMENT SYSTEM, *IN JAVA*
The current blood donation process is often slow and disorganized
due to manual record-keeping and poor data management. so we use in online mode register and scheduling donations to keep the record safe and quick access

PERSONAL INFO

Motivated and detail-oriented graduate with strong problem-solving skills and a good foundation in programming and analytical thinking. Eager to contribute to organizational goals while continuously learning and improving.

Enthusiastic and dedicated software developer with hands-on experience in Java, Python, and database management. Strong understanding of OOP concepts, debugging, and building simple applications. Committed to delivering clean, efficient code and learning new technologies.
